

Part 2 Exam

Identifying my strengths and areas for improvement

1. Prior to taking the test: Rate yourself on each objective on a scale of 1 to 3. Give yourself a “1” if you don’t understand the topic, a “2” if you need more review, and a “3” if you understand the topic well.
2. Please look at your corrected test and mark whether each problem is right or wrong. Then look at the problems you got wrong and decide if you made a simple mistake. If you did, mark the “simple mistake” column. For all the remaining problems you got wrong, mark the “more study” column.

#	OBJECTIVE	RATE YOURSELF	What do I need to do?	What problems in the book will help?	Have I improved?	RATE YOURSELF
1	I can identify mean & standard deviation given data					
2	I can state the z-score formula					
3	I can plug the mean and standard deviation into the score formula correctly given a data point					
4	I can identify the mean & standard deviation in a contextual situation					
5	I can identify a data point in a contextual situation					
6	I can plug the mean, standard deviation & data point into the formula correctly					
7	I can interpret the meaning of the z-score in context					
8	I can compare two z-scores in different contexts (two different exams for instance)					
9	I can find two z-scores on the same context					
10	I can find the area in between the two z-scores					
11	I can find the area outside the two z-scores
